

Automatic Safety Shut-Off System

Installing Replacement Safety Shut-Off Valve Assembly

NOTE: It is always recommended that a licensed plumber installs the Gas Lantern and replacement parts

NOTE: DO NOT OVERTIGHTEN BRASS

NOTE: Use pipe thread sealant or similar on all threaded fittings.

Step 1: Turn gas off inside the light and at the main line or the external shut off valve if so equipped.

Step 2: Remove existing gas tip using a 7/16" wrench. **ITEM A**

Step 3: Remove existing Safety Shut-Off Valve/Thermocouple. **ITEM B**

Step 4: Install pre-assembled Safety Shut-Off Valve/Thermocouple. **ITEM B *new**

Step 5: Install gas tip into barrel coupling at top of replacement safety valve. **ITEM A**

Step 6: See Initial Setup
